
The Holocaust ↗

Wikipedia • The Holocaust, known in Hebrew as the Shoah, was the genocide of European Jews during World War II. From 1941 to 1945, Nazi Germany and its collaborators systematically murdered around six million Jews across German-occupied Europe, approximately two-thirds of Europe's Jewish population.

The story you were taught about World War II is incomplete.

History textbooks tell us WWII began when Hitler invaded Poland in 1939. But the real origins of the deadliest conflict in human history trace back to bankers, not generals. To boardrooms, not battlefields.

In this video, we expose the economic forces that mainstream narratives conveniently ignore:

→ How the Treaty of Versailles created a financial time bomb that destabilized Europe for two decades

→ The Dawes Plan: How Wall Street pumped billions into Germany, creating a fragile house of cards that collapsed in 1929

→ The exposed connection between the Great Depression and Hitler's rise from fringe extremist to Chancellor

→ The uncomfortable truth about Ford, General Motors, IBM, and Standard Oil doing business with Nazi Germany—some even after war broke out

→ Why the Nazi economic model required conquest to survive

This isn't conspiracy theory. This is documented history buried in archives, exposed at Nuremberg, and examined in Congressional investigations. The records exist. Most people just never look.

Understanding how economic forces create political monsters isn't just about the past. It's about recognizing the warning signs before the next catastrophe.

"I spent 33 years and four months in active service as a member of our country's most agile military force, the Marine Corps. And during that period, I spent most of my time being a high-class muscle man for Big Business, for Wall Street and the bankers." General Smedley Butler

HIS STORY.
Thomas Paine said, " Government at its very best is a necessary evil and at its worst it is an intolerable one." And its been a long time since its been at its best.

Yep. Even Hitler in his political testament accuses equally the Bankers for the War.

There really was no WW1 and WW2. There was one war that some historians are now calling the Second Thirty Years War because the two so-called separate wars are intricately linked. But behind both wars are lots of financial and banking influence that most people are unaware of. In the end, only the bankers win and the people on all sides lose.

Pat Buchanan explained in his book “Churchill´s war” the true origin of war. Anthony Sutton as well (Wall Street and the rise of Nazis).

Official history is always false. It’s written by the victors in order to justify their actions and blame the war on the defeated country.

There is a very old saying " Those who fail to learn the lessons of the past are destined to repeat the mistakes of the past".

The fact the history books have been white washed with lies means those lessons can never be learnt and the plebs shall continue to pay the ultimate price.

WW1 killed 8.5 Million, not 20 Million, but the H1N1 disease, which the USA brought to Europe in March 1918 killed 100 Million in just 2 years - the US wrote it out of history.
The Treaty of Versailles destroyed the Economic Machine of Europe - Germany and with it Europe itself. The Treaty made the US to the New Superpower and the US got drunk on it....
